Controllable properties

Each control is listed by its panel name. Use the description to decide what to listen for, then make small changes in the context of the music.

Control and settings	What it changes
Bypass Range: Off, On Default: Off	Turns the complete effect off or on for a direct before-and-after comparison.
High Range: 20 to 20000 Default: 4500	Sets the top of the frequency area that will be rearranged.
Low Range: 20 to 20000 Default: 300	Sets the bottom of the frequency area that will be rearranged.
Program Range: 12 factory programs Default: Init	Loads a factory starting point. Adjust the controls afterward to fit the current sound.
Scramble Amount Range: 0 to 100 Default: 50	Sets how strongly the selected frequencies are rearranged.
