## Controllable properties

Each control is listed by its panel name. Use the description to decide what to listen for, then make small changes in the context of the music.

| Control and settings                                                | What it changes                                                                         |
|---------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| <b>Bypass</b><br>Range: Off, On<br>Default: Off                     | Turns the complete effect off or on for a direct before-and-after comparison.           |
| <b>Distance</b><br>Range: 0 % to 100 %<br>Default: 0 %              | Moves the sound from close to far away.                                                 |
| <b>Front Back</b><br>Range: B 100 % to F 100 %<br>Default: F 100 %  | Moves the sound in front of or behind the listener.                                     |
| <b>Height</b><br>Range: -100 % to 100 %<br>Default: 0 %             | Moves the sound below or above the listener.                                            |
| <b>Output Trim</b><br>Range: -24 dB to 0 dB<br>Default: 0 dB        | Lowers the final level to leave headroom after spatial processing.                      |
| <b>Pan</b><br>Range: -100 % to 100 %<br>Default: 0 %                | Moves the sound left or right.                                                          |
| <b>Program</b><br>Range: 6 factory programs<br>Default: Front Focus | Loads a factory starting point. Adjust the controls afterward to fit the current sound. |

| Control and settings                                               | What it changes                                                         |
|--------------------------------------------------------------------|-------------------------------------------------------------------------|
| <b>Render Mode</b><br>Range: Stereo, Headphones<br>Default: Stereo | Chooses regular stereo speakers or headphone-focused spatial rendering. |
| <b>Room</b><br>Range: 0 % to 100 %<br>Default: 35 %                | Adds surrounding room cues so the position feels less dry and close.    |
