Controllable properties

Each control is listed by its panel name. Use the description to decide what to listen for, then make small changes in the context of the music.

Control and settings	What it changes
Bypass Range: Off, On Default: Off	Turns the complete effect off or on for a direct before-and-after comparison.
Frequency Range: 0.1 to 5000 Default: 120	Chooses the main tonal area or carrier pitch used by this control.
Mix Range: 0 to 100 Default: 50	Blends the original sound with the processed sound.
Program Range: 6 factory programs Default: Init	Loads a factory starting point. Adjust the controls afterward to fit the current sound.
Shape Range: Sine to Square Default: Sine	Moves the internal carrier from a smooth sine wave toward a sharper square wave.
Tone Range: 500 to 20000 Default: 12000	Darkens or brightens the metallic side frequencies created by the effect.
