

TB Shimmer

USER MANUAL

Purpose

Expands sound into pitch-shifted particles and a long, bright, floating space.

Controllable properties

Each control is listed by its panel name. Use the description to decide what to listen for, then make small changes in the context of the music.

Control and settings	What it changes
Bypass Range: Off, On Default: Off	Turns the complete effect off or on for a direct before-and-after comparison.
Density Range: 2 to 24 Default: 9	Sets how many particles are created each second.
Feedback Range: 0 to 88 Default: 42	Returns the effect into itself to build a longer and more intense tail.
Level Var Range: 0 to 12 Default: 0	Varies particle level so the cloud feels less flat and more layered.
Mix Range: 0 to 100 Default: 48	Blends the original sound with the processed sound.
Pitch Range: -12 to +24 Default: +12	Sets the main pitch interval of the shimmer particles.
Pitch Spray Range: 0 to 12 Default: 0.1	Adds small or large pitch differences between individual particles.

Control and settings	What it changes
Position Rand Range: 0 to 100 Default: 32	Varies where each particle begins around the Time setting.
Program Range: 100 factory programs Default: Init	Loads a factory starting point. Adjust the controls afterward to fit the current sound.
Reverse Range: 0 to 100 Default: 18	Sets how often particles play backward and bloom into the sound.
Scatter Range: 0 to 100 Default: 32	Spreads particle timing, size, and stereo position for a less uniform cloud.
Size Range: 40 to 500 Default: 160	Sets the length of each particle. Short values sound detailed; long values blend into a smooth wash.
Time Range: 60 to 1200 Default: 240	Sets how far behind the dry sound the particle cloud begins.
Tone Range: 1200 to 18000 Default: 9000	Darkens or brightens the particles and the long tail.
Width Range: 0 to 200 Default: 135	Sets the stereo spread of the processed sound.
